C-FIBRE PRODUCT TERMS AND CONDITIONS

54. Cell C will not be held liable for the non-conformance of speed tests conducted over a Wi-Fi connection. Speed tests conducted over a Wi-Fi connection is not recommended due to the fact that Wi-Fi technology operates on an open frequency band and is prone to a lot of environmental interference and noise, the number of devices connected simultaneously causes the Wi-Fi speeds to deteriorate and the Wi-Fi range or distance could also hinder the speed performance. Cell C C-Fibre subscribers are advised that speed tests for C Fibre must be conducted over the wired fibre connection i.e. Computer must be connected directly to the router via the Ethernet port to determine the actual line speeds of the C Fibre service. In order to run a speed test C-Fibre subscribers are advised to use www.speedtest.net, select the Cell C server and run the test.
